Backup battery	3*D-cell batteries (not included) to ensure auto-feeding when power failure
Standby mode	Power consumption 5V/120UA, 0.6W

▼ Packing info:

Pet feeder dimension	330*260*300mm (L*W*H)
1pcs /CTN	33.7*26.6*34.4cm (L*W*H), G.W.3.3KG
4pcs/CTN	69.5*28*71.5cm (L*W*H)

▼ What is Included?

- Smart Pet Feeder x 1
- Power Adapter x 1
- Quick Start Guide x 1

petrust

The smart pet feeder is a great helper in addition to your feeding system. It is perfect for pets like puppies and kittens that require a small portion of meal at regular times. It could not only allow you to feed your pets remotely, but also feed your pets automatically according to the feeding schedule.

The hopper could hold up to 3.3 litters of food. We recommend the user to feed smooth dry food which the diameter could not exceed 10mm in diameter. Please note that the feeder is not suitable for wet food. There is a built-in weighing unit helping you to feed your pets more efficient. The built-in speaker would allow you to record a voice message that could be played at each mealtime to call your pet.

for your **Pet**, the best **Trust**

In order for preventing the risk from a power failure, the feeder could be operated by backup batteries. It would still be able to feed your pet by the schedule. However, the feeder could not be programmed or communicated when it is in battery mode.

The feeder features high definition 1080P H.264 video resolution with micro-SD card support (up to 128GB). You could easily share the joyful moment with record files and snapshots to social network.

You could also feed your pets with the command voice sending to smart speakers such as Amazon Echo. Etc.

petrust

Smart Pet Feeder

Remote feeding and viewing, WiFi and automatic dual mode.
Accurate weighing and healthy feeding.

1080p Video Quality

The 1080p video quality is the highest among others. Moreover, the output could be 540p and 360p. With 2.8mm lens, the view angle could reach140°.
We have more than 15 years of experience in security industry and 4 years in wireless IP camera. Therefore, we would be more professional on the wireless video.
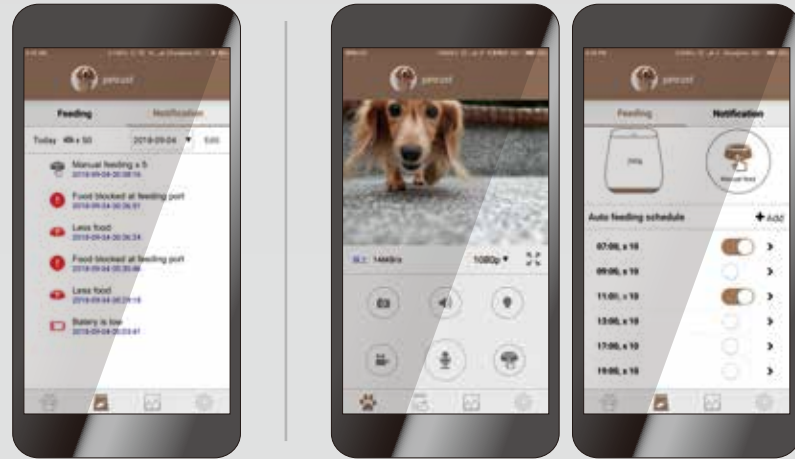

Customize Meal Time

The feeder could be setup up to 12 meals according to your pets need.

2-way audio control

The Alexa audio control would be included and updated by the end of 2018.

Intelligent anti-clockwise

When the feeder detects food stuck inside the container, it would perform anti-clockwise for solving the problem.

IR detection

By using the IR detection, it could prevent food blocking inside the container. If your pets do not eat within 10 minutes, the device would send notification through your mobile phone App.

Weighing function

The weighting module could monitor the remaining pet food. When the remaining food amount is lower than 250g, the device would send notification through your mobile phone App.

Photo electric switch

The pet feeder is using photo electric for checking the portion(s) of the meal.
It is more reliable than mechanical structure.

Easy Cleaning

Transparent cover allow you to know the food level in the hopper, Removable hopper and food tray for easy cleaning

Transprent Cover

Dual Power Supply

DC5V/2A Power Adaptor

3 * D Cell Batteries

Patent design

Our unique & patent design is different from other pet feeders. Not only the base of the feeder is larger, but also the power line goes from the bottom of the feeder would increase the stability.
